OBJECTIVE

Software Development | Junior Systems Analyst and Developer | Data Analyst and RPA

PROFESSIONAL SUMMARY

Systems Development Technician certified by SENAI and currently pursuing a degree in Computer Science, currently working as a Digital Transformation Intern at Merck Life Science. Experience in REST API development using FastAPI and Python, process automation with Power Automate, data manipulation, SQL databases, Docker, Azure DevOps, and CI/CD practices. Knowledge of React, Next.js, Power BI, automated testing, Web Scraping, and development of solutions focused on digital transformation.

PROFESSIONAL EXPERIENCE

I work as a Digital Transformation Intern in the Regulatory Affairs area at Merck Life Science, developing and maintaining automations using Python (Pandas and Web Scraping) and Power Automate, contributing to process optimization and internal systems integration. I also work on the creation and maintenance of Power BI dashboards and web interfaces using React, Next.js, and Streamlit with Material UI and Chakra UI. Additionally, I actively participate in the development of structured documentation, project management and tracking in Azure DevOps, as well as deployment, containerization, and monitoring of applications using Docker, Podman, and Azure Pipelines.
